

# IT/OT Incident Response Services

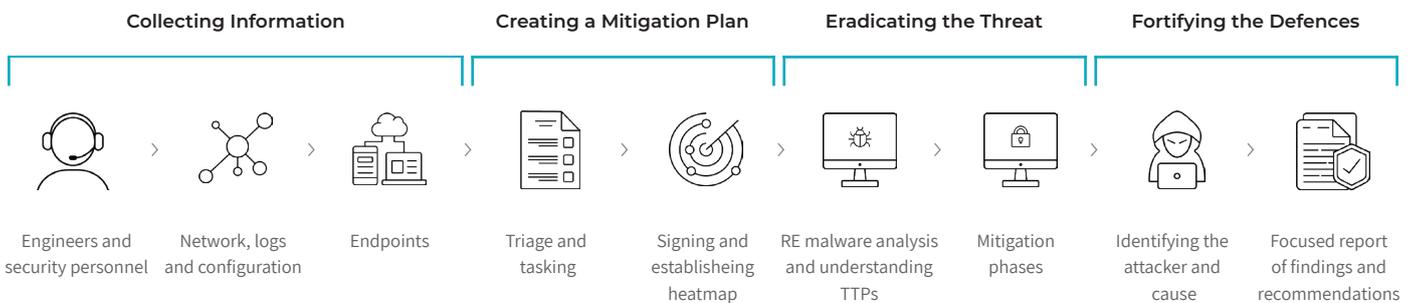

When it comes to ensuring operational integrity, no organization is 100% immune to cyber attacks. Once a breach is identified, a timely response is critical in order to reduce the potential impact and return to normal operations.

OTORIO uses Incident Response to ensure a fast and efficient response to security breaches.

## Industrial Incident Response

OTORIO's Incident Response teams are trained to promptly restore the OT network without sacrificing its safety condition. Based on an unmatched nation-state military experience defending mission-critical infrastructures, OTORIO's teams have developed a tailored approach to industrial Incident Response.

OTORIO's Incident Response team takes immediate responsibility for the entire security operations once an incident has occurred

## Benefits

- Years of Incident Response in the IDF's most 'mission-critical' environments strengthened the competence and operational urgency of our IR experts
- As a part of a holistic solution, OTORIO collects and analyzes unique information from various sources using a proprietary automated platform, enabling fast and efficient detection and mitigation
- Our deep knowledge in industrial systems enables us to respond in the safest way without harming any of the operational processes

## Use cases

### Warning signs

#### Remote Incident Response

OTORIO's risk monitoring and management platform automatically alerts the SOC of a dormant malware, which activates the Incident Response team

### Post breach

#### Full Incident Response

The operating personnel notices a machine that has stopped working for no apparent reason, he then contacts the Incident Response team to investigate

**Once escalated to full Incident Response, OTORIO's team takes immediate responsibility, identifies the root cause, and mitigates the threat. Our team provides a focused report of findings and recommendations to prevent similar incidents in the future.**

## OTORIO - Industrial-native cyber and digital risk-management solutions provider

OTORIO combines the professional experience of top nation-state cyber-security experts with cutting edge digital risk-management technologies to provide the highest level of protection for the manufacturing industry. OTORIO's automated Digital Risk-based Maintenance solution aggregates threat data analysis to provide deep insights into industrial control systems, identifying risks and mitigating them before they can cause damage.

Our cyber experts work closely with our customers' cyber and operational teams to tailor solutions that address their specific industrial digital security needs, according to their level of digital maturity. OTORIO empowers industrial companies to implement, automate, and operate secure production, making way for a safer, more reliable and productive industry.
